# 1937

Westgold's parent company, Westland Milk Products, was founded in 1937 from a number of small regional producers

Westland Milk Products is one of New Zealand's largest dairy processors

approx.  
**400**  
dairy farms  
(West & East Coast farms)

**2nd**  
largest producer  
of butter in NZ

each year more than  
**150,000mt**  
of dairy products are  
produced

Exported to over  
**17**  
countries

# Westgold™

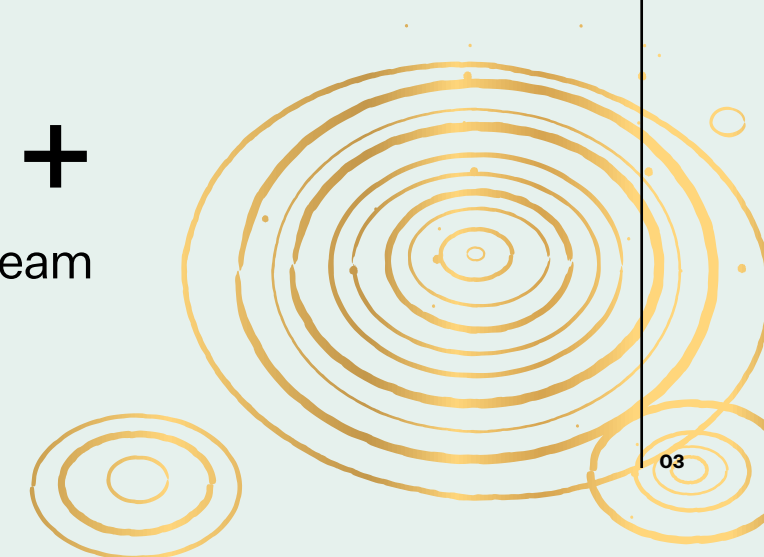

The Westgold brand was established in 2004

**41**  
million +  
blocks of Westgold  
Butter are packed  
each year

Westgold Butter has been winning medals at the prestigious NZ Champion of Cheese Awards since 2016.

**1 million +**  
litres of Westgold UHT Cream  
and Westgold UHT Milk  
produced annually

# Westgold's home is on the West Coast of New Zealand's South Island.

A remote area known for its rugged coastline, towering mountains, fresh air, and pouring rain.

**There's no better place to make the finest dairy products.**

Nature just happens to have created what we believe are the lushest, greenest pastures you could ever wish to farm. And that's what we have been doing, for over 125 years. Perfecting our craft over generations, working with respect for the environment, the land, and the animals.

The result is a rich flavour that's as natural as our surroundings. Whether you're whipping up your favourite comfort food, or experimenting with something new, it'll take your taste-buds all the way to the West Coast.

# Westgold products have been perfected over generations.

From humble beginnings churning butter on the West Coast of New Zealand's South Island, almost 150 years ago, our parent company, Westland Milk Products, continues to craft high-quality dairy products for markets around the globe.

We are proud of our past. The courageous decisions and pioneering spirit of previous generations have shaped our company into today's successful dairy processing business.

**1893**

Dairy production began on the West Coast

**1937**

Westgold's parent company, Westland Milk Products, was founded from a number of small regional producers

**1963**

Spray drying of skim milk commenced at the Hokitika Milk Powder Factory

**1980**

A new butter factory was commissioned

**2004**

The Westgold brand was launched into international markets

**2015**

Westgold UHT Milk and UHT Cream were launched

**2020**

Westgold 1kg Milk Powder was launched

**2021**

Upgrades to the butter factory completed, doubling our pat capacity

# A homeland abundant in natural resources.

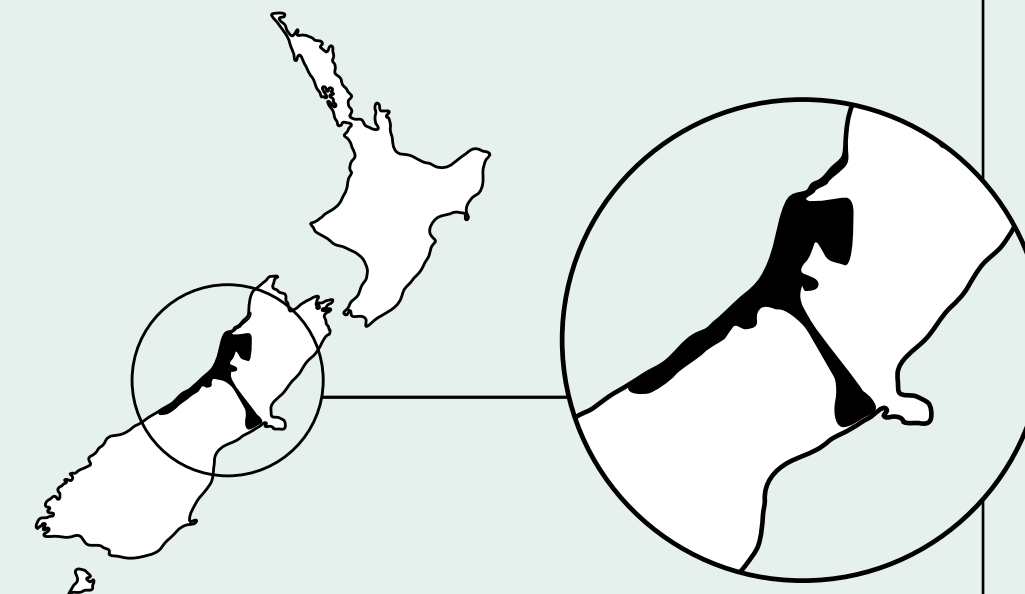

## Westland's milk supply comes from around 400 farms within our specific milk catchment area.

This defined farm production area is much smaller than the catchments of other New Zealand dairy companies with our milk coming from only 3.46% of all milking cows in New Zealand.

Westland's milk suppliers' farms are located in what we regard as one of the finest, most unique dairy farming environments in the world.

The West Coast is home to just 0.64% of our country's population and only 3.1% of its dairy cows, it is sparsely populated in every direction. The West Coast has the lowest stocking rate per hectare (2.21 cows) and this ensures our cows have plenty of space to graze.

On the other side of those same mountains, over some of the highest, most glacial mountains in the country, but still less than 100 kilometres away, are Canterbury's broad pastures. One of New Zealand's most significant arable and agricultural farming areas, Canterbury is home to 7% of our supplying farms.

# Cows grazed on our lush green pastures produce a rich milk full of natural health benefits.

Milk from grass-fed cows is of a superior quality and provides the natural rich taste that Westgold is known for.

Grazing is a cow's natural state, but it is in fact a minority practice in global dairy production. At the 2018 Grass-fed Dairy Conference, Ireland's Agriculture and Food Development Authority (Teagasc) reported that up to 90% of the world's milk is produced by cows that don't graze. Those cows eat some grass, but are largely fed a diet of corn, soy, alfalfa, barley and other grains.

The cream that we use to create our butter is sourced from dairy farms with Jersey and Kiwi Cross herds that operate on a pastoral (grass-fed and free-range) basis. This means that all dairy cows live and graze, free-range, all year round, and have daily access to pastures 365 days of the year, except when it is

necessary to temporarily remove cows from pasture due to:

- Milking (up to a maximum of twice per 24-hour period)
- Environmental conditions
- Regulatory compliance
- Veterinary advice
- Transportation

These grass pastures ensure much higher levels of beta-carotene in the milk than grain-fed cows.

The rich golden colour, particularly noticeable in our churned butter, is a result of the beta-carotene in the grass which is stored in the cows' fat and carried into the milk.

# Claims and certifications

**Food safety is not only vital, it underpins everything we do. We provide full traceability through to the delivery of the end product. From farm, to factory, to market, the quality of our milk ensures the integrity and quality of our products at every step of the supply chain. Working with global, market leading companies, we are committed to world class quality practices and traceability.**

## Halal

Westgold carries a Halal certification. Halal food has been prepared according to Islamic law, and is free from pork products, alcohol and certain other ingredients.

## Kosher

Westgold carries a Kosher certification. This is a process where food is certified as fit for consumption by people who practice a religious dietary protocol rooted in Jewish biblical tradition.

## EcoVadis

Westland Milk Products has been awarded a silver medal by internationally renowned corporate social responsibility auditor EcoVadis. This major achievement places us in the top 30% of companies that have completed the EcoVadis assessment.

## Non GMO

The global trend for discerning consumers to look towards more natural foods aligns with a desire for non-genetically modified (non-GMO) products. All Westgold Butter, UHT Cream and UHT Milk are non-GMO.

Westgold Full Cream Milk Powder contains lecithin potentially derived from GMO sources. These ingredients are highly refined, so the final products are not required to be labelled as GMO under the criteria specified in FSANZ section 1.5.2 part 4.

# Westgold Butter

Traditionally crafted using the time-honoured Fritz Churn method, our pure, creamy butter has a rich golden colour and distinctive flavour.

Westgold Butter is naturally high in nutrients, including omega 3 fatty acids, conjugated linoleic acid, vitamin E and Beta carotene. Both unsalted and salted Westgold Butters exclude any preservatives or food additives (other than the salt slurry added at the end of the butter making process for our salted butter) and are made to Halal and Kosher standards.

# Retail Butter

Loved for its flavour and renowned for its versatility.

## 250g Salted / Unsalted

Weight	250g

# Masters’ Series

In the demanding, ever changing world of cuisine you need a butter that performs every time. Westgold’s Masters’ Series is created for culinary professionals, traditionally churned with expertise by our master butter makers for perfect results every time.

The Masters’ Series stamp of quality is a mark you can trust.

Our pioneering forebears set their butter apart using a stamp just like this. Stamping accentuated their butter’s consistency and quality — a tradition we retain and celebrate today on our Westgold Masters’ Series.

Westgold Butter — Crafted to Perform.

# Foodservice Butter

Crafted to perform every time.

## 454g Salted / Unsalted

Weight	454g

Westgold UHT Milk offers consistency you can count on and, more importantly, it delivers the rich natural flavour you expect from fresh milk.

# Westgold UHT Milk

We’ve perfected the art of making our long-life milk because we believe convenience without compromise is the best kind of convenience. Food safety underpins everything we do, and our UHT Full Cream Milk is processed in our state-of-the-art Tetra Pak facility in Rolleston, so you can be assured of its quality.

## 1L UHT Milk Full Cream

Item Code	7055
Volume	1L
Height (incl. cap)	193mm
Width	90mm
Depth	57mm
Units Per Carton	12
Cartons Per Pallet	96
Layers Per Pallet	6
Pallets Per 40' FCL	20
Metric Tonne Per 40' FCL	23.04
Unit Barcode	9421016153107
Cartons Barcode	19421016153104
Fat (total) per 100ml	3.6g
Protein per 100ml	3.7g

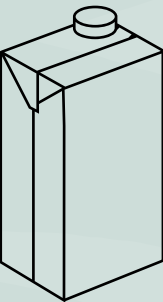

Westgold UHT Cream has a natural dairy flavour and is renowned for enhancing the flavours of the items it is paired with.

# Westgold UHT Cream

Westgold UHT Cream is processed in our state-of-the-art Tetra Pak facility in Rolleston. Using an indirect heating technology to produce a long shelf-life, Westgold UHT Cream is suitable for a wide range of product, culinary and industrial applications.

## 1L UHT Cream

Item Code	7256
Volume	1L
Height (incl. cap)	193mm
Width	90mm
Depth	57mm
Units Per Carton	12
Cartons Per Pallet	96
Layers Per Pallet	6
Pallets Per 40' FCL	20
Metric Tonne Per 40' FCL	23.04
Unit Barcode	9421016153091
Cartons Barcode	19421016153098
